To invest in a Class other than MYR Class and/or MYR-Hedged Class, investors are required to have a foreign currency account with any Financial Institution as all transactions relating to the particular foreign currency will ONLY be made via telegraphic transfer.

The Morningstar Rating is an assessment of a Fund's past performance-based on both return and risk-which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision.

Where a distribution is declared, investors are advised that following the issue of additional Units/distribution, the NAV per Unit will be reduced from cum-distribution NAV to ex-distribution NAV.

Very High includes Funds with VF that are above 14.4. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future.
